Turning Tools Inside ▶

Your Source for Fully Stocked Turning Tools

## Make More with Micro 100

### Endurance & Quality

Micro 100 tooling is engineered using the latest CNC grinding technology and manufacturing practices to create the industry's highest quality products.

### Powerful Performance

Micro 100 tooling is designed to excel at vastly increased speed and feed rates while providing exceptional results in a wide array of difficult-to-machine materials.

### Earned Reputation

Micro 100 has built, and earned, an international reputation for manufacturing high quality solid carbide turning tools that are built to last.

Harvey Performance Company combines the leading Harvey Tool, Helical Solutions, Micro 100 brands, and Titan USA to provide world class tooling, unmatched service, and innovative solutions that increase productivity for our customers.

#### Think Harvey Tool First

More than 25,000 miniature and specialty end mills. Ship today, in your machine tomorrow.

[www.harveytool.com](http://www.harveytool.com)

#### Let Helical Impress You

Material-optimized high performance carbide end mills. Run faster, push harder, machine smarter.

[www.helicaltool.com](http://www.helicaltool.com)

#### Make More with Micro 100

Exceptional quality turning tools designed for durability and performance in a range of difficult-to-machine materials.

[www.micro100.com](http://www.micro100.com)

#### Trust in Titan USA

Broad assortment of premium quality, fully stocked, general purpose cutting tools of exceptional value.

# Our Make More Promise

In today's competitive machining industry, the pressure is high for shops to increase metal removal rates, boost productivity, and improve their bottom line. When "making more" is pivotal, you can count on Micro 100 to help you gain a competitive edge and set your shop up for success. From our expansive tool offering and off-the-shelf availability, to our excellent product quality and highly repeatable Micro-Quik™ Quick Change system, we guarantee you'll Make More with Micro 100 every time you choose us.

# Micro 100 Micro-Quik™

Radial and axial repeatability. Tip-to-tip consistency. Part-to-part accuracy.

Micro 100's Micro-Quik™ is a breakthrough tool change system that saves machinists countless hours by allowing for incredibly fast tool changes without sacrificing locational repeatability or machining accuracy. This fool proof system delivers impressive radial and axial repeatability, tip-to-tip consistency, and part-to-part accuracy.

In critical accuracy situations, many customers have enjoyed .0002" tool-to-tool repeatability, achieved in fewer than 30 seconds. This is 90% faster than conventional tool change methods, which oftentimes take in excess of 5 minutes, start-to-finish.

Because of its simplicity and extremely low margin for error, Micro-Quik™ is the preferred tool change method of machine shops worldwide, even those employing new and up-and-coming machinists.

## A Unique Design

Micro 100's Micro-Quik™ features a whistle notch configuration, proven to enhance axial accuracy over the standard set screw design used by other quick change system manufacturers. The whistle notch used by Micro 100 ensures that the tool is always held in location, anchored accurately in place, and pushed completely against the locating mechanism.

This axial consistency prevents all-too-common tool failures, scrap parts, and lost machine time due to improperly secured tools.

## Incredible Benefits

Micro-Quik™ users have long enjoyed the benefits it provides: tool changes in less than 30 seconds, fewer tool change errors, impressive radial and axial repeatability, and increased machine up-time.

Learn which quick change tool holder is best for you on pg 10

## How It Works

During tool changes, the precision ground bevel specially engineered on the rear of each Micro 100 quick change tool aligns with a locating pin in the quick change tool holder. The distance from this locational point to the tip of the tool is highly controlled, meaning that our Micro-Quik™ tooling system ensures a very high degree of tool length and centerline repeatability.

## Easy 3-Step Process

1. Remove the existing tool by loosening the set screw.
2. Remove the used tool.
3. Insert the new tool and retighten the set screw.

# Quick Change Tool Holders

Begins on pg 50

Our Spring 2021 Product Catalog introduces new headless-style quick change tool holders to Micro 100's offering, rounding out our **fully stocked** selection of best-in-class tool holders that deliver unparalleled speed, repeatability, and accuracy. Our newest quick change holders are engineered for **use in all Swiss, standard lathe, or multi-function lathe machines** and are designed for ease of installation through the back side of the tooling block.

Plumbed & Ported  
QTSP pg 50

## New Straight Quick Change Tool Holders

- Enhanced application flexibility and headless design
- Optimized for use in any Swiss, standard lathe, or multi-function lathe
- Offered with ported, plumbed, or ported & plumbed coolant access options
- Designed for ease of installation through the back side of the tooling block
- Stocked in standard and long length styles

Choose from 5 time-saving Quick Change holder styles!

Unmatched Speed, Repeatability, & Accuracy

**New!**

Headless tool holders engineered for use in any Swiss, standard, or multi-function lathe machine. Designed for ease of installation through the back side of the tooling block.

Right Hand – Sharp – Miniature

Quick Change – Boring Tools

- Designed for facing and boring applications in bores .015" and larger
- Polished split face for improved edge retention and chip evacuation while reducing galling
- Split geometry makes the tool as rigid as possible
- On center neck design allows for static (D<sub>1</sub>) and live/rotating (D<sub>R</sub>) applications
- Coolant fed enabled shank design
- Sharp corner profile
- Proprietary Micro-Quik™ quick change system maximizes productivity through reliable accuracy and locational repeatability
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide
- CNC ground in the USA

Quick Change – Boring Tools

QBB

Quick Change – Boring Tools  
Right Hand

- Designed for facing and boring applications in bores .110" and larger
- Polished split face for improved edge retention and chip evacuation while reducing galling
- Split geometry makes the tool as rigid as possible
- Coolant fed enabled shank design
- Corner radius profile
- Proprietary Micro-Quik™ quick change system maximizes productivity through reliable accuracy and locational repeatability
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

Coolant Groove Styles

See pg 50-62 for quick change holder options

See pg 12 for miniature sizes

For better chip control and freer cutting action, see Helical Back Rake and Top Rake Chipbreaker tools on pgs 17-20

**QHBBC**

**Quick Change – Boring Tools**  
Helical Back Rake – Corner Radius

- Designed for boring applications in bores .0275" and larger
- Polished face for improved edge retention and chip evacuation while reducing galling
- Helical grind provides ideal top rake for better chip control and freer cutting
- Well suited for machining plastics
- On center neck design allows for static (D<sub>1</sub>) and live/rotating (D<sub>r</sub>) applications
- Coolant fed enabled shank design
- Corner radius profile
- Proprietary Micro-Quik™ quick change system maximizes productivity through reliable accuracy and locational repeatability
- Solid carbide ■ CNC ground in the USA

Quick Change – Boring Tools

QBM

Quick Change – Boring Tools  
Boring Head Tools

- Designed for boring applications requiring maximum rigidity
- Tapered neck and top rake geometry for increased performance
- Polished face for reducing galling
- Coolant fed enabled shank design
- Corner radius profile
- Proprietary Micro-Quik™ quick change system maximizes productivity through reliable accuracy and locational repeatability
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

# Quick Change – Boring Tools

QRB

## Reverse Boring

Quick Change – Boring Tools

- Designed to bore from the inside, toward the face of the part
- Polished split face for improved edge retention and chip evacuation while reducing galling
- Split geometry makes the tool as rigid as possible
- Coolant fed enabled shank design
- Inside corner radius profile
- Proprietary Micro-Quik™ quick change system maximizes productivity through reliable accuracy and locational repeatability
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

QPR

Quick Change – Profiling Tools

Radial Profiling

- Designed for radial profiling
- Excellent choice for fine finishing
- Can be used in thread relief applications
- Split geometry makes the tool as rigid as possible
- Coolant fed enabled shank design
- Corner radius profile
- Proprietary Micro-Quik™ quick change system maximizes productivity through reliable accuracy and locational repeatability
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

# Quick Change – Profiling Tools

QPF

## Axial Profiling

Quick Change – Profiling Tools

- Designed for both radial and axial profiling
- Unique design maximizes tool versatility and part feature creation
- Polished split face for improved edge retention and chip evacuation while reducing galling
- Split geometry makes the tool as rigid as possible
- Coolant fed enabled shank design
- Corner radius profile
- Proprietary Micro-Quik™ quick change system maximizes productivity through reliable accuracy and locational repeatability
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

# Quick Change – Grooving Tools

## Retaining Ring – Square – Miniature

QMRR

- Designed for generating retaining ring grooves in bores .060" and larger
- Polished face for improved edge retention and chip evacuation while reducing galling
- On-center neck design
- Coolant fed enabled shank design
- Sharp corner profile
- Proprietary Micro-Quik™ quick change system maximizes productivity through reliable accuracy and locational repeatability
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

# Quick Change – Grooving Tools

QRR

## Retaining Ring – Square

- Designed for generating retaining ring grooves in bores .180" and larger
- Polished split face for improved edge retention and chip evacuation while reducing galling
- Coolant fed enabled shank design
- Sharp corner profile
- Proprietary Micro-Quik™ quick change system maximizes productivity through reliable accuracy and locational repeatability
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

**Quick Change - Grooving Tools**  
Retaining Ring - Corner Radius - Right Hand

- Designed for generating corner radius retaining ring grooves in bores .180" and larger
- Corner radius designed for extended tool life and finished groove profiling
- Polished split face for improved edge retention and chip evacuation while reducing galling
- Coolant fed enabled shank design
- Proprietary Micro-Quik™ quick change system maximizes productivity through reliable accuracy and locational repeatability
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

Quick Change – Grooving Tools

QMFR

Quick Change – Grooving Tools

Full Radius – Miniature

- Designed for generating full radius grooves in bores .080" and larger
- Polished face for improved edge retention and chip evacuation while reducing galling
- On-center neck design
- Coolant fed enabled shank design
- Full radius profile
- Proprietary Micro-Quik™ quick change system maximizes productivity through reliable accuracy and locational repeatability
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

See pg 33 for miniature sizes

# Quick Change – Grooving Tools

QUP

## Undercutting – Full Radius

Quick Change – Grooving Tools

- Designed for plunging full radius undercut grooves and profiling
- Polished split face for improved edge retention and chip evacuation while reducing galling
- Full radius profile
- Coolant fed enabled shank design
- Proprietary Micro-Quik™ quick change system maximizes productivity through reliable accuracy and locational repeatability
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

## QFG

Quick Change – Grooving Tools  
Face Grooving – Square

- Designed for generating square grooves in the face of the part
- Polished split face for improved edge retention and chip evacuation while reducing galling
- Split geometry makes the tool as rigid as possible
- Relief ground along Maximum Bore Depth (L<sub>2</sub>) to avoid interference during deep hole applications
- Coolant fed enabled shank design
- Sharp corner profile
- Proprietary Micro-Quik™ quick change system maximizes productivity through reliable accuracy and locational repeatability
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

Quick Change – Grooving Tools

QFGC

Quick Change – Grooving Tools

Face Grooving – Corner Radius

- Designed for generating corner radius grooves within the face of the part
- Polished split face for improved edge retention and chip evacuation while reducing galling
- Split geometry makes the tool as rigid as possible
- Relief ground along Maximum Bore Depth (L2) to avoid interference during deep hole applications
- Coolant fed enabled shank design
- Corner radius profile
- Proprietary Micro-Quik™ quick change system maximizes productivity through reliable accuracy and locational repeatability
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

# Quick Change – Threading Tools

## UN Threads – Single Point – Miniature

QIT

Quick Change – Threading Tools

- Designed for threading in bores .035" and larger
- Able to cut multiple thread pitches (ANSI, UN, & Metric 60°) with one tool
- Polished split face for improved edge retention and chip evacuation while reducing galling
- On-center neck design
- .002" tip radius
- Coolant fed enabled shank design
- Proprietary Micro-Quik™ quick change system maximizes productivity through reliable accuracy and locational repeatability
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

Quick Change – Threading Tools

QSPD

Quick Change – Holmaking Tools  
Spotting Drills

- Designed for spot drilling
- Available in 90°, 120°, and 140° included angles
- Can be utilized for countersinking and chamfering existing holes
- Narrow web thickness allows for spotting small diameter holes
- Point geometry designed for self-centering
- Coolant fed enabled shank design
- Proprietary Micro-Quik™ quick change system maximizes productivity through reliable accuracy and locational repeatability

QSD

## Spade Drills

- Designed for drilling in hardened materials
- Excellent option when requiring holes free of retract marks in non-ferrous materials
- Coolant fed enabled shank design
- Point geometry designed for self-centering
- 118° tip angle
- Coolant fed enabled shank design
- Proprietary Micro-Quik™ quick change system maximizes productivity through reliable accuracy and locational repeatability
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

Quick Change – Holmaking Tools  
Countersink & Chamfer Tools

- Designed for countersinking and chamfering
- Available in 60°, 82°, 90°, 100°, and 120° included angles
- Tip Diameter (D<sub>1</sub>) is non-cutting
- Multi-tooth for greater metal removal rates
- Coolant fed enabled shank design
- Proprietary Micro-Quik™ quick change system maximizes productivity through reliable accuracy and locational repeatability
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

# Quick Change – Holders & Parts

QTS / QTSP

## Tool Holders – Straight Holder – Standard Length

Quick Change – Holemaking Tools

- Headless tool holder engineered for maximum versatility in any Swiss, standard lathe, or multi-function lathe
- Standard plumbed and 3 ported options for more enhanced coolant accessibility
- Proprietary Micro-Quik™ quick change system maximizes productivity through reliable accuracy and locational repeatability
- Headless design allows for installation through the back of the tooling block in machines where work envelope is limited
- Top screw orientation for easy access to set screw without interference of adjacent tools
- 4 alignment flats allow for multiple tool engagements and holder orientations
- Holder plumbed for NPT coolant connection
- Heat treated and black oxide coated for durability and corrosion resistance
- Precision manufactured in the USA

# Quick Change – Holders & Parts

QTSL / QTSP

## Tool Holders – Straight Holder – Long Length

- Quick change, long length tool holder designed for applications requiring an extended reach
- Headless tool holder engineered for maximum versatility in any Swiss, standard lathe, or multi-function lathe
- Standard plumbed and 3 ported options for more enhanced coolant accessibility
- Proprietary Micro-Quik™ quick change system maximizes productivity through reliable accuracy and locational repeatability
- Headless design for installation through the back of the tooling block in machines where work envelope is limited
- Top screw orientation for easy access to set screw without interference of adjacent tools
- 4 alignment flats allow for multiple tool engagements and holder orientations
- Heat treated and black oxide coated for durability and corrosion resistance
- Precision manufactured in the USA

## Quick Change – Holders &amp; Parts

## Tool Holders – Headed Holder – Standard Length

- Quick change tool holder plumbed for NPT coolant connection and designed for use in lathe applications
- Proprietary Micro-Quik™ quick change system maximizes productivity through reliable accuracy and locational repeatability
- Unique “3 point” locking and locating system ensures axial and radial tool repeatability, tip-to-tip consistency, and part-to-part accuracy
- 4 alignment flats allow for multiple tool engagements and holder orientations
- Heat treated and black oxide coated for durability and corrosion resistance
- Precision manufactured in the USA

Quick Change – Holders & Parts  
Tool Holder System – Double Ended Modular

- Quick change tool holder designed for use in twin spindle and Y-axis tooling block locations
- Proprietary Micro-Quik™ quick change system maximizes productivity through reliable accuracy and locational repeatability
- Unique “3 point” locking and locating system ensures axial and radial tool repeatability, tip-to-tip consistency, and part-to-part accuracy
- 4 alignment flats allow for multiple tool engagements and holder orientation flexibility
- Assemble unit prior to installation to reduce setup time
- Left and right holder design orients set screws on the same side as operator for easy access
- Left hand head has left hand threaded set screw
- Ported adapter included for coolant delivery
- Heat treated and black oxide coated for durability and corrosion resistance
- Precision manufactured in the USA

## Quick Change – Holders & Parts

### Tool Holders – Star Swiss Machines – SR-10J

- Quick change tool holder designed for use in Star Swiss machine model SR-10J
- Proprietary Micro-Quik™ quick change system maximizes productivity through reliable accuracy and locational repeatability
- Designed for use with .1875", .2500", and .3125" diameter quick change tools
- Qualify with quick change centerline indicating tool (QI)
- Unique "3 point" locking and locating system ensures axial and radial tool repeatability, tip-to-tip consistency, and part-to-part accuracy
- Coolant delivered via external coolant port – adapter included
- Heat treated and black oxide coated for durability and corrosion resistance
- Precision manufactured in the USA

# Standard – Boring Tools

## Right Hand – Sharp – Miniature

MBB / MBBM

- Designed for facing and boring applications in bores .015" and larger
- Polished face for improved edge retention and chip evacuation while reducing galling
- Split geometry makes the tool as rigid as possible
- On center neck design allows for static (D<sub>1</sub>) and live/rotating (D<sub>R</sub>) applications
- Sharp corner profile ■ Lockdown flat automatically locates tool on center
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

See pg 270 for tool set options

# Standard – Boring Tools

BBS / BBM

Right Hand – Sharp

- Designed for facing and boring applications in bores .039" and larger
- Polished split face for improved edge retention and chip evacuation while reducing galling
- Split geometry makes the tool as rigid as possible
- Sharp corner profile
- Lockdown flat automatically locates tool on center
- Coating options provide added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

Standard – Boring Tools

Standard – Boring Tools

BB

Standard – Boring Tools  
Right Hand

- Designed for facing and boring applications in bores .050" and larger
- Polished split face for improved edge retention and chip evacuation while reducing galling
- Split geometry makes the tool as rigid as possible
- Corner radius profile
- Lockdown flat automatically locates tool on center
- Coating options provide added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

Standard – Boring Tools

See pg 272 for tool set options

**BBL**

**Standard – Boring Tools**

**Left Hand**

- Designed for left hand facing and boring applications
- Polished split face for improved edge retention and chip evacuation while reducing galling
- Split geometry makes the tool as rigid as possible
- Corner radius profile
- Lockdown flat automatically locates tool on center
- Coating options provide added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

# Standard – Boring Tools

HBBC

## Helical Back Rake – Corner Radius

- Designed for boring applications in bores .0275" and larger
- Polished face for improved edge retention and chip evacuation while reducing galling
- Helical grind provides ideal top rake for better chip control and freer cutting
- Well suited for machining plastics
- On center neck design allows for static (D<sub>1</sub>) and live/rotating (D<sub>R</sub>) applications
- Lockdown flat automatically locates tool on center
- Corner radius profile
- Solid carbide ■ CNC ground in the USA

# Standard – Boring Tools

HBB / HBM

## Helical Back Rake

- Designed for boring applications in bores .018" and larger
- Polished face for improved edge retention and chip evacuation while reducing galling
- Helical grind provides ideal top rake for better chip control and freer cutting
- Uncoated variant ideal for plastics
- On center neck design allows for static (D<sub>1</sub>) and live/rotating (D<sub>R</sub>) applications
- Cylindrical shank (no set screw flat)
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

## Top Rake Chipbreaker

- Optimized for finishing operations
- Top rake geometry provides freer cutting
- Polished face for reducing galling
- Corner radius profile
- Lockdown flat automatically locates tool on center
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

Standard – Profiling Tools

Radial Profiling

- Designed for radial profiling
- Excellent choice for fine finishing
- Can be used in thread relief applications
- Split geometry makes the tool as rigid as possible
- Corner radius profile
- Lockdown flat automatically locates tool on center
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

## Axial Profiling

- Designed for both radial and axial profiling
- Unique design maximizes tool versatility and part feature creation
- Polished split face for improved edge retention and chip evacuation while reducing galling
- Split geometry makes the tool as rigid as possible
- Coolant fed enabled shank design
- Corner radius profile
- Lockdown flat automatically locates tool on center
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

Standard – Grooving Tools

See pg 272 for tool set options

RRL

Standard – Grooving Tools  
Retaining Ring – Square – Left Hand

- Designed for generating retaining ring grooves in a left hand turning application
- Polished split face for improved edge retention and chip evacuation while reducing galling
- Sharp corner profile
- Lockdown flat automatically locates tool on center
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

**RRC**

**Standard – Grooving Tools**  
Retaining Ring – Corner Radius – Right Hand

- Designed for generating corner radius retaining ring grooves in bores .180" and larger
- Corner radius designed for extended tool life, and finished groove profiling
- Polished split face for improved edge retention and chip evacuation while reducing galling
- Coolant fed enabled shank design
- Lockdown flat automatically locates tool on center
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

Standard – Grooving Tools

UC

Standard – Grooving Tools  
Undercutting – Square

- Designed for plunging square undercut grooves
- Polished split face for improved edge retention and chip evacuation while reducing galling
- Sharp corner profile
- Lockdown flat automatically locates tool on center
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

## Standard – Grooving Tools O-Ring Grooving

- Designed for creating O-ring grooves
- Polished split face for improved edge retention and chip evacuation while reducing galling
- Lockdown flat automatically locates tool on center
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

## Face Grooving – Square

- Designed for generating square grooves in the face of the part
- Polished split face for improved edge retention and chip evacuation while reducing galling
- Split geometry makes the tool as rigid as possible
- Relief ground along Maximum Bore Depth (L<sub>2</sub>) to avoid interference during deep hole applications
- Sharp corner profile
- Lockdown flat automatically locates tool on center
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials ■ Solid carbide ■ CNC ground in the USA

## Face Grooving – Corner Radius

FGC

- Designed for generating corner radius grooves in the face of the part
- Polished split face for improved edge retention and chip evacuation while reducing galling
- Split geometry makes the tool as rigid as possible
- Relief ground along Maximum Bore Depth (L2) to avoid interference during deep hole applications
- Corner radius profile
- Lockdown flat automatically locates tool on center
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

FGF

## Face Grooving – Full Radius

- Designed for generating full radius grooves in the face of the part
- Polished split face for improved edge retention and chip evacuation while reducing galling
- Split geometry makes the tool as rigid as possible
- Relief ground along Maximum Bore Depth (L2) to avoid interference during deep hole applications
- Full radius profile
- Lockdown flat automatically locates tool on center
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

## Standard – Threading Tools

### UN Threads – Single Point – Right Hand

- Designed for threading multiple thread pitches (ANSI, UN, and Metric 60°)
- Polished split face for improved edge retention and chip evacuation while reducing galling
- Split geometry makes the tool as rigid as possible
- Corner radius profile
- Lockdown flat automatically locates tool on center
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

Standard – Threading Tools

See pg 257 for tool set options

ITL

Standard – Threading Tools  
UN Threads – Single Point – Left Hand

- Designed for threading multiple thread pitches (ANSI, UN, and Metric 60°) in a left hand threading application
- Polished split face for improved edge retention and chip evacuation while reducing galling
- Split geometry makes the tool as rigid as possible
- Corner radius profile
- Lockdown flat automatically locates tool on center
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

ITM

Standard – Threading Tools  
Metric Shank – Single Point – Right Hand

- Designed for threading multiple thread pitches (ANSI, UN, & Metric 60°)
- Polished split face for improved edge retention and chip evacuation while reducing galling
- Split geometry makes the tool as rigid as possible
- Corner radius profile
- Lockdown flat automatically locates tool on center
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

# Standard – Tool Holders

TH / THM

- Tool holder optimized for use with Micro 100 standard shank tools in lathe applications
- Head allows for consistent length when seated against the tooling block.
- Ability for tool to be mounted in 4 different orientations, 90 degrees apart, due to 4 alignment flats on shank
- Tools can be set at any length in the holder, allowing for maximum rigidity to reduce chatter and harmonics during machining
- Heat treated and black oxide coated for durability and corrosion resistance
- Precision manufactured in the USA

## T

## Brazed – Cut Off Tools

## T Style – Regular

- Double end "T" style cut-off tool that is parallel ground to help achieve a straighter cut
- Tops are hollow ground to help curl the chip to center for better evacuation
- Hardened and precision ground steel blades
- Ground in the USA

# Brazed – Cut Off Tools

T-V

## T Style – V-Groove

- Double ended "T" style cut-off tool that is parallel ground to help achieve a straighter cut
- Tops are hollow ground to help curl the chip to center for better evacuation
- Additional V-groove ground into the top of the tool forces the chip into a "W" form to pull the chip to center resulting in better surface finish and chip evacuation
- Hardened and precision ground steel blades
- Ground in the USA

End Mills

- Designed for general purpose micromachining
- Cutter diameter down to .005"
- 30° helix ■ Center cutting ■ Square profile
- AlTiN coating option for added lubricity and increased wear resistance in difficult-to-machine materials
- Solid carbide ■ CNC ground in the USA

**End Mills – Square**  
2, 3, 4 Flute

- Designed for general purpose machining
- 30° helix ■ Center cutting ■ Square profile
- AlTiN coating option for added lubricity and increased wear resistance in difficult-to-machine materials
- Solid carbide ■ CNC ground in the USA

End Mills – Square  
2, 3, 4, 6 Flute – NC Tolerance

- General purpose end mill with .001" plus tolerance on the cutting diameter
- Weldon flat featured on sizes 3/8" and larger
- 30° helix ■ Center cutting ■ Square profile
- AlTiN coating option for added lubricity and increased wear resistance in difficult-to-machine materials
- Solid carbide ■ CNC ground in the USA

## TSM

## End Mills – Square

### 3 Flute – Tapered End Mill

- Designed to machine tapered profiles in cavities
- Well suited for die and mold making applications
- Available in standard and long length styles
- 30° helix ■ Center cutting
- AlTiN coating option for added lubricity and increased wear resistance in difficult-to-machine materials
- Solid carbide
- CNC ground in the USA

## BEL / BELM

## End Mills – Ball

### 2, 3, 4 Flute – Long Flute

- Long reach for deep pocket milling and long length peripheral milling
- 30° helix ■ Center cutting
- Ball profile
- AlTiN coating option for added lubricity and increased wear resistance in difficult-to-machine materials
- Solid carbide
- CNC ground in the USA

# End Mills – Ball

## 2, 3, 4 Flute – Reduced Neck

**BLR / BLRM**  
**SFBM / MMBM**

End Mills

- Long reach for deep pocket milling
- SFBM and MMBM manufactured to improved cutter diameter tolerance (h8) for mold making
- 30° helix ■ Center cutting
- Ball profile
- AlTiN coating option for added lubricity and increased wear resistance in difficult-to-machine materials
- Solid carbide
- CNC ground in the USA

## MMRM

## End Mills – Corner Radius

### 2 Flute – Reduced Neck

- Designed for mold making applications
- Manufactured to tighter cutter diameter tolerance (h8) for mold making applications
- Long reach for deep pocket milling
- Reduced neck diameter to avoid heeling
- Corner radius profile
- 30° helix ■ Center cutting
- AlTiN coating option for added lubricity and increased wear resistance in difficult-to-machine materials
- Solid carbide ■ CNC ground in the USA

# End Mills For Hardened Steels

HMCM

## Corner Radius – 4 Flute

Hardened Steels

- Designed for high performance in hardened tool, die, stainless, and mold steels
- Optimized geometry for increased edge strength in hard milling applications
- Corner radius profile for added edge strength
- 45° helix ■ Center cutting
- AlTiN coating option for added lubricity and increased wear resistance in difficult-to-machine materials
- Solid carbide ■ CNC ground in the USA

End Mills For Steels & High Temperature Alloys  
Square – 2 & 3 Flute – Stub Flute

- Designed for high performance in titanium alloys, inconel, nickel alloys, and other high-temperature materials with outstanding performance in difficult-to-machine steels, stainless steels, and tool steels
- Stub flutes for maximum rigidity
- Square profile ■ 20° helix ■ Center cutting
- nACRo® coating option for added heat resistance in difficult-to-machine materials
- Solid carbide ■ CNC ground in the USA

End Mills For Steels & High Temperature Alloys

Square – 2 & 3 Flute – Long Reach, Stub Flute

- Designed for high performance in titanium alloys, inconel, nickel alloys, and other high-temperature materials with outstanding performance in difficult-to-machine steels, stainless steels, and tool steels
- Long reach for deep pocket milling
- Stub flutes for maximum rigidity
- Reduced neck diameter to avoid heeling
- Square profile ■ 20° helix ■ Center cutting
- nACRo® coating option for added heat resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

End Mills For Steels & High Temperature Alloys  
Square – 3 & 4 Flute

- Designed for high performance in titanium alloys, inconel, nickel alloys, and other high-temperature materials with outstanding performance in difficult-to-machine steels, stainless steels, and tool steels
- 60° high helix for reduced cutting forces and increased material removal rates
- Square profile ■ Center cutting
- AlTiN coating option for added lubricity and increased wear resistance in difficult-to-machine materials
- Solid carbide ■ CNC ground in the USA

# End Mills For Steels & High Temperature Alloys

## Square – 4 Flute – Chipbreaker Rougher

SHR / SHRM  
SHL / SHLM

Steels & High Temp. Alloys

- Designed for roughing in titanium alloys, inconel, nickel alloys, and other high-temperature materials with outstanding performance in difficult-to-machine steels, stainless steels, and tool steels
- Integrated chipbreaker geometry generates increased material removal rates
- Available in standard and long length of cut options
- Weldon flat featured on sizes 3/8" and larger
- Square profile ■ 38° helix ■ Center cutting
- AlTiN coating option for added lubricity and increased wear resistance in difficult-to-machine materials
- Solid carbide ■ CNC ground in the USA

End Mills For Steels & High Temperature Alloys

Square – 5 Flute – Stub Flute

- Designed for applications in titanium alloys, inconel, nickel alloys, and other high-temperature materials with outstanding performance in difficult-to-machine steels, stainless steels, and tool steels
- 45° high helix for reduced cutting forces and increased material removal rates
- Stub flutes for maximum rigidity
- Square profile ■ Center cutting
- AlTiN coating option for added lubricity and increased wear resistance in difficult-to-machine materials
- Solid carbide ■ CNC ground in the USA

## Ball – 2 & 3 Flute – Long Reach, Stub Flute

Steels & High Temp. Alloys

- Designed for high performance in titanium alloys, inconel, nickel alloys, and other high-temperature materials with outstanding performance in difficult-to-machine steels, stainless steels, and tool steels
- Long reach for deep pocket milling
- Stub flutes for maximum rigidity
- Reduced neck diameter to avoid heeling
- Ball profile ■ 20° helix ■ Center cutting
- nACRo® coating option for added heat resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

# End Mills For Steels & High Temperature Alloys

MEF / MEFM

Corner Radius – 2 & 3 Flute – Stub Flute

- Designed for high performance in titanium alloys, inconel, nickel alloys, and other high-temperature materials with outstanding performance in difficult-to-machine steels, stainless steels, and tool steels
- Stub flutes for maximum rigidity
- Corner radius profile ■ 20° helix ■ Center cutting
- nACRo® coating option for added heat resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

Steels & High Temp. Alloys

MEF / MEFM

End Mills For Steels & High Temperature Alloys  
 Corner Radius – 2 & 3 Flute – Long Reach, Stub Flute

- Designed for high performance in titanium alloys, inconel, nickel alloys, and other high-temperature materials with outstanding performance in difficult-to-machine steels, stainless steels, and tool steels
- Long reach for deep pocket milling
- Stub flutes for maximum rigidity
- Reduced neck diameter to avoid heeling
- Corner radius profile ■ 20° helix ■ Center cutting
- nACRo® coating option for added heat resistance in difficult to machine materials
- Solid carbide ■ CNC ground in the USA

Steels & High Temp. Alloys

VHS / VHSM  
VHM / VHMM

End Mills For Steels & High Temperature Alloys  
Corner Radius – 4 Flute – Variable Helix

- Designed for high performance in titanium alloys, inconel, nickel alloys, and other high-temperature materials with outstanding performance in difficult-to-machine steels, stainless steels, and tool steels
- Variable helix design reduces chatter and harmonics and increases material removal rates
- Specialized geometry for maximum performance in high velocity tool paths
- Corner radius profile
- Weldon flat offered on sizes 3/8" and larger ■ Center cutting
- AlTiN coating option for added lubricity and increased wear resistance in difficult-to-machine materials
- Solid carbide ■ CNC ground in the USA

# End Mills For Steels & High Temperature Alloys

## Corner Radius – 4 & 5 Flute – Variable Helix – Long Flute

VLM

Steels & High Temp. Alloys

- Designed for high performance in titanium alloys, inconel, nickel alloys, and other high-temperature materials with outstanding performance in difficult-to-machine steels, stainless steels, and tool steels
- Variable helix design reduces chatter and harmonics and increases material removal rates
- Specialized geometry for maximum performance in high velocity tool paths
- Long flutes for deep pocket milling
- Corner radius profile
- Weldon flat offered on sizes 3/8" and larger
- Center cutting
- AlTiN coating option for added lubricity and increased wear resistance in difficult-to-machine materials
- nACRo® coating option for added heat resistance in difficult to machine materials
- Solid carbide
- CNC ground in the USA

End Mills For Aluminum Alloys

Square – 2 Flute – Stub Flute

- Designed for exceptional performance in aluminum, non ferrous materials and soft materials
- 45° high helix for reduced cutting forces and increased material removal rates
- Stub flutes for maximum rigidity
- Square profile
- Center cutting
- ZrN coated option for high hardness, lubricity, and abrasion resistance
- Solid carbide ■ CNC ground in the USA

# End Mills For Aluminum Alloys

ARM / ARMM

## Square – 2 & 3 Flute

- Designed for exceptional performance in aluminum, non ferrous materials and soft materials
- 45° high helix for reduced cutting forces and increased material removal rates
- Square profile
- Center cutting
- ZrN coated option for high hardness, lubricity, and abrasion resistance
- Solid carbide ■ CNC ground in the USA

# End Mills For Plastics & Composites

## Square – Single Flute – Downcut Router

SFL / SLFM

- Single flute design for applications in plastics and composites
- Left hand spiral routers drive chips downward, preventing delamination in multi-layered workpieces
- Polished flute improves chip evacuation
- Optimized geometry for increased material removal rates
- End cutting
- Solid carbide ■ CNC ground in the USA

Drill/End Mills

# Chamfer Cutters

CS

- Designed for chamfer milling, countersinking, and deburring
- Double-ended
- Available in 60°, 82°, 90°, 100°, and 120° included angles
- Tip Diameter (D<sub>1</sub>) is non-cutting
- Multi-tooth for greater metal removal rates
- AlTiN coating option for added lubricity and increased wear resistance in difficult-to-machine materials
- Solid carbide
- CNC ground in the USA

# Corner Rounding End Mills

CREM

## 3 Flute – Single Ended

- Designed to mill corner radii into a part
- 1° max flares tangent at pilot and shoulder to avoid steps and burrs
- Cuts on radius only
- AlTiN coating option for added lubricity and increased wear resistance in difficult-to-machine materials
- Solid carbide ■ CNC ground in the USA

Corner Rounding End Mills

# Dovetail Cutters

DT

- Designed to mill dovetail grooves into a part
- Offered with 30°, 60°, and 90° included angles
- AlTiN coating option for added lubricity and increased wear resistance in difficult-to-machine materials
- Solid carbide
- CNC ground in the USA

# Thread Milling Cutters

## Single Form – UN Threads

- Mills internal and external 60° UN threads
- Single thread form designed to mill common pitch sizes
- Single form design reduces tool pressure for deep thread milling applications
- Mills right hand and left hand threads
- AlTiN coating option for added lubricity and increased wear resistance in difficult-to-machine materials
- Solid carbide ■ CNC ground in the USA

## TM

## Thread Milling Cutters

### Single Form – UN Threads – Reduced Shank

- Mills internal and external 60° threads
- Single thread form designed to mill common UN and metric pitch sizes
- Single form design reduces tool pressure for deep thread milling applications
- Reduced shank design can be chucked at any depth
- Mills right hand and left hand threads
- AlTiN coating option for added lubricity and increased wear resistance in difficult-to-machine materials
- Carbide head brazed to carbide shank
- CNC ground in the USA

# Thread Milling Cutters

## Multi-Form – UN Threads

TM

- Mills internal and external 60° UN threads
- Able to cut larger threads of the same pitch
- 100% thread form creates superior threads vs. tapping
- Mills right and left hand threads
- Helical flutes
- AlTiN coating option for added lubricity and increased wear resistance in difficult-to-machine materials
- Solid carbide
- CNC ground in the USA

## MTR

## Thread Milling Cutters

### Thread Relief Cutter

- Designed for milling thread relief at the bottom of a thread
- Relief operation typically done before threading to avoid thread form damage
- Chamfer eliminates burrs and partial threads at last thread
- Carbide head brazed to carbide shank
- CNC ground in the USA

**"THE ORIGINAL"**  
**SPEEDY SHARP**  
World's Fastest Sharpener®

Utilizing the same strong, durable carbide as Micro 100 cutting tools, the Speedy Sharp sharpens everything from pocket knives to lawn mower blades with ease.

**Quickly &  
Effectively  
Sharpens**

- Knives
- Scissors
- Axes
- Hunting Knives
- Gardening Tools
- Lawn Mower Blades
- Razor Blades
- Chisels
- Planer Blades
- Router Bits
- Fish Hooks

TOOL # KS-1

Add a Speedy Sharp (KS-1) to your tooling order today for only \$11.95!

## Sets

### Standard – Boring Tools – Right Hand – Sharp – Miniature

Sets

- Designed for facing and boring applications in bores .015" and larger
- Polished face for improved edge retention and chip evacuation while reducing galling
- Split geometry makes the tool as rigid as possible
- On center neck design allows for static (D<sub>1</sub>) and live/rotating (D<sub>R</sub>) applications
- Sharp corner profile
- Lockdown flat automatically locates tool on center
- AlTiN coated option provides added lubricity and increased wear resistance in difficult to machine materials
- Solid carbide
- CNC ground in the USA

## Sets

### Brazed – Forming Tools – 90° Radius Concave – Left Hand

Sets

- Left hand tool designed for forming a convex radius
- Tangential 5° blend angles
- Zinc coated shanks provide durability and corrosion resistance
- Available in industry standard fractional shank sizes
- Ground in the USA

# Coatings Chart

Coating/ Substrate:	TiN  Titanium Nitride -G	AlTiN  Aluminum Titanium Nitride -X	nACRo®  Aluminum Chromium Nitride Silicone -K	ZrN  Zirconium Nitride -S
Application/ Benefits:	<ul style="list-style-type: none"> <li>General purpose coating with proven performance and increasing tool productivity with higher feeds and speeds in machining of ferrous materials and in applications that are not generating excessive/ extreme heat</li> </ul>	<ul style="list-style-type: none"> <li>Maintains high surface hardness at elevated temperatures, promotes tool life and allows for faster feeds and speeds</li> <li>Higher breakdown temperatures</li> <li>High Performance and versatile coating</li> <li>Excellent for dry-machining</li> </ul>	<ul style="list-style-type: none"> <li>Extremely heat and scratch resistant coating that provides exceptional performance for those "tough and difficult" materials where temperatures increase dramatically during the machining application</li> </ul>	<ul style="list-style-type: none"> <li>Better tool performance over uncoated carbide in numerous non-ferrous materials</li> <li>Characteristics include a high hardness with lubricity and abrasion resistance</li> <li>Generally, an alternative to diamond coatings</li> </ul>
Materials:	General purpose, ferrous and non-ferrous materials	Alloy steels, stainless steels, tool steels, titanium, inconel, nickel and other aerospace materials	Aluminum Alloy Steels, Carbon Steels, Stainless Steels, Hardened Steels, Nickel Alloys, Cast Irons, Titanium and other High Temperature Alloys	Abrasive non-ferrous alloys such as Brass, Bronze, Copper and Abrasive Aluminum Alloys
Color:	Gold	Dark Gray / Black	Black / Gray	Light Gold / Champagne
Structure:	Mono-layer	Multi-layer	Nano-composite	Mono-layer
Hardness (HV 0.05):	2170 (21 GPa)	3569 (35 GPa)	4079(40 GPa)	2460 (24 GPa)
Coefficient of Friction:	.50	.60	0.45	.50
Coating Thickness (microns):	2 - 5	2 - 5	1 - 7	2 - 5
Max. Working Temp:	1000° F	1400° F	2012° F	1100° F

PLEASE NOTE: Information and test results were compiled from multiple sources and testing methods. Data presented is intended to be a general application guideline for comparing various coatings.

**"THE ORIGINAL"**  
**SPEEDY SHARP**  
World's Fastest Sharpener®

Utilizing the same strong, durable carbide as Micro 100 cutting tools, the Speedy Sharp sharpens everything from pocket knives to lawn mower blades with ease.

**Quickly & Effectively Sharpens**

- Knives
- Scissors
- Axes
- Hunting Knives
- Gardening Tools
- Lawn Mower Blades
- Razor Blades
- Chisels
- Planer Blades
- Router Bits
- Fish Hooks
