

Weldon Tool

Catalog 2012

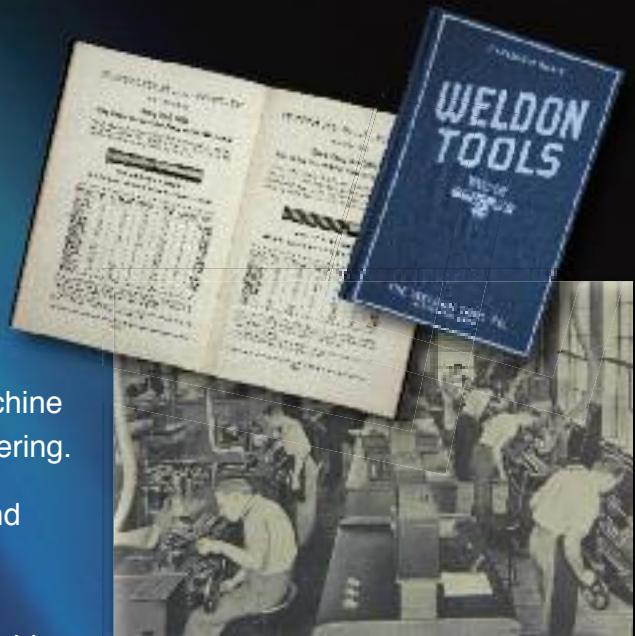

WELDON®

History

F

or nearly a century, the Weldon brand has been known for a strong tradition of craftsmanship, innovation and the highest standards of quality. Our deep engineering roots brought to market products like the Crest-Kut®, Zero Flute Countersink, Ski-Carb® and premium carbide end mills like the Tri-Power. Weldon's commitment helping customers maximize machine productivity is the driving force behind our round tool offering.

In support of providing you with the finest, solid-round tools in the market, we continue to re-invest in the latest manufacturing hardware, software and supporting tools.

Our objective is to provide our customers with Weldon tools that will exceed their requirements and expectations. Our pattern and level of investment are driven by these goals.

When you purchase a Weldon product, you are not only buying a tool, you will also receive the best customer and technical support in the industry. We stand behind every product made, not only in terms of product performance, but

also for inside and field technical support. Our end-use customers are manufacturers. Our business is dependent upon the health and productivity of manufacturers. We are committed to your machining productivity and success.

How the Catalog Is Organized

We have organized this catalog in what we believe to be an easy to use systematic format, allowing the user to readily find the needed information.

Table of Contents

This section allows you to quickly reference the substrate or type of tool you are looking for. We have divided the catalog into sections; Premium Carbide, Crest-Kuts®, BullDog® Roughers, General Purpose High Speed Steel, General Purpose Cobalt and Specialty Tools. At the beginning of each section there is an expanded listing that provides information such as; number of flutes, single end /double end, helix angle and center cutting /non center cutting.

Surface Treatments and Coatings.....	Page 2
Premium Carbide End Mills.....	Page 5
Crest-Kuts®.....	Page 33

Powdered Metal End Mills.....	Page 91
Countersinks and Specialty Tools.....	Page 97

Tool Series and EDP Number Index

New for this catalog, we have placed an EDP index in the back of the catalog that allows you to find the page number of a specific tool when the EDP number is known.

WELDON®

Coatings

Coatings

All of our tools are available in a variety of application specific surface treatments and coatings. Please see individual tool listings for stocked treatments and coatings. Other treatments and coatings are available upon request. These surface treatments and coatings are designed to enhance performance as well as the life of the tool. The chart below is a handy reference outlining the surface treatment and coating composition as well as the suggested application. If the material you are preparing to machine is not listed, please give us a call and we can help.

Code No.	Composition	Characteristics	Application
	69 Amorphous Diamond Coating	Synthetic diamond. Low co-efficient of friction. Approximately three times harder than TiCN.	High abrasive applications, graphite, fiberglass, ceramics and composites.
	70 Aluminum Chromium Nitride (AlCrN)	Excellent coating that provides high oxidation resistance and high temperature wear resistance.	Very effective in wet/dry milling of steels, cast iron, aerospace inconel and titanium alloys.
	84 Titanium Aluminum Nitride (TiAIN)	A very hard coating recommended for harder alloys which has very good wear resistance, reduces friction and prevents galling.	Titanium, titanium alloys, nickel-base alloys, stainless steel and cast iron. Effective at higher speed. Not recommended for wrought aluminum, copper or brass.
	85 Aluminum Titanium Nitride (AlTiN)	An extremely hard coating very similar to TiAIN with outstanding wear resistance. AlTiN has a higher aluminum content which makes it harder and smoother than TiAIN.	Very effective in the same materials as TiAIN. Excellent for small depths of cut and excels in high speed and dry machining applications.
	86 Zirconium Nitride (ZrN)	A thin hard coating that improves lubricity and increases oxidation resistance. Specifically designed for machining abrasive and gummy materials.	Suitable for machining aluminum alloys, high silica aluminum, cast iron, high temperature alloys, stainless steel and glass filled plastics. Not recommended for machining carbon steels.
	88 Titanium Nitride (TiN)	A general purpose coating which has excellent wear resistance, reduces friction and prevents galling.	Most ferrous materials. Although it's unlikely, galling may occur in titanium and titanium alloys. (Not recommended for aluminum.)
	89 Titanium Carbo Nitride (TiCN)	An extremely hard coating which has outstanding wear resistance, reduces friction and prevents galling.	Most ferrous, non-ferrous and non-metallic materials. Very effective at higher speeds. Although it's unlikely galling may occur in titanium and titanium alloys.
00	NO COATING		

Premium Carbide Tool Application Guide

For both our Aluminum/Non-ferrous and our Ferrous Alloy offerings, we provide tool application guidelines as part of the table of contents for each material application section. Tools are arrayed in a continuum from primarily roughing to primarily finishing operations. In the middle are those tools which can perform well as rougher/finishers. This table and the recommendations below should assist in tool selection and application. As always, additional application assistance is available from our technical service department.

Aluminum and Non-Ferrous Alloys

Series	Description	Page
ROUGHING		
2AR	2 Flute, 40 Degree Helix, Roughing, will profile, slot and Pocket.	6
2AR-BN	2 Flute, 40 Degree Helix for Contour Milling, Roughing. Ball Nose.	8
Ski-Carb®	2 Flute, 45 Degree Helix, for Roughing and Finishing.	10
Tri-Power^{3®}	3 Flute, 45 Degree Helix, for Finishing and Roughing.	12
3AF	3 Flute, 40 Degree Helix, for Finishing.	14
FINISHING

4SV	4 Flute, 40 Degree Helix, Variable Index, Rougher	22
4SR	4 Flute, 40 Degree Helix, Rougher/Finisher	24
4SR-BN	4 Flute, 40 Degree Helix, Rougher/Finisher	26
5SF	5 Flute, 40 Degree Helix, Finisher, Profile Rougher	28
FINISHING		

Weldon® Premium Carbide for Aluminum & Non-Ferrous Alloys

Weldon's Premium Carbide line of end mills has been engineered to machine Aluminum and Non-Ferrous Alloys in roughing, finishing and somewhere in between. The following pages address not only the material machining but also if the operation requires pure roughing, roughing-finishing or a finishing cut only. Weldon® has engineered its line of Premium Carbide end mills to maximize machine time and tool life.

The logo consists of the word "WELDON" in a bold, sans-serif font, with a registered trademark symbol (®) at the top right. It is set against a blue triangular background.

2AR-2 Flute Rougher

Technical Chart

The 2AR is designed for roughing in non-ferrous alloys where the application demands a high metal removal. The high helix combined with a cylindrical margin allows for a chatter resistant, smooth machining in all non-ferrous alloys.

2AR-BN Ball Nose, 2 Flute Rougher

Technical Chart

The 2AR-BN is a ball nose premium carbide end mill for roughing non-ferrous alloys where the application demands a high metal removal rate. The 40 degree helix with a cylindrical margin for chatter resistant smooth machining in all non-ferrous alloys.

Ski-Carb® 2 Flute Rougher/Finisher

Technical Chart

The Ski-Carb® was designed specifically for machining aluminum at maximum speeds on both conventional, CNC and high performance machining centers. The 45 degree helix provides greater shearing action, improved workpiece finish and contributes to the chip ejection forces initiated by the Ski-Land.

Speed in Surface Feet per Minute (SFM)

Tri-Power^{3®} 3 Flute Finisher/Rougher

Technical Chart

The Tri-Power^{3®} is a patented three flute premium carbide end mill designed for roughing and finishing in aluminum and non-ferrous alloys. The high shear, 45 degree helix and improved inter-flute geometries enhance chip evacuation and permit increased chip loads as well as aggressive feed rates.

3AF-3 Flute Finisher

Premium Carbide

- 40 Degree Cylindrical Margin
- Finishing in Aluminum and Non-Ferrous Alloys
- Available with Square and Radius Ends
- Available as Uncoated, TiCN and ZrN Coatings

- Available Upon Request:
 - Coolant Grooves
 - Additional Coatings
 - Specials

Weldon® Premium Carbide for Steel and Ferrous Alloys

Weldon's Premium Carbide line of end mills has been engineered to machine Steel and Ferrous Alloys for roughing, finishing and somewhere in between. The following pages address not only the material machining but also if the operation requires pure roughing, roughing-finishing or a finishing cut only. Weldon® has engineered its line of Premium Carbide end mills to maximize machine time and tool life.

The logo consists of the word "WELDON" in a bold, sans-serif font, with a registered trademark symbol (®) at the top right. The text is set against a blue triangular background.

Steel and Ferrous Materials Alloys

ROUGHING

Series	Description	Page

5SF	5 Flute, 40 Degree Helix, Finisher	28

FINISHING

3SR-3 Flute Rougher

Technical Chart

The 3SR is a premium carbide end mill designed specifically for roughing and rough slotting. A full eccentric primary grind, standard corner radius and a 40 degree flute helix ensures an excellent chip evacuation. Tools are stocked coated with either AlTiN or TiCN.

4SV-4 Flute Rougher

Technical Chart

The 4SV is a variable indexed, premium carbide tool with standard corner radius, 40 degree helix and full eccentric grind. The 4SR features combined with the harmonic dampening of variably indexed flutes results in a tool that can be used at the highest feeds and speeds with depth of cut up to 1 x tool diameter.

5SF-5 Flute Finisher

Technical Chart

The 5SF is a finishing premium carbide end mill. It has a full eccentric primary grind, 40 degree helix for proper chip evacuation and odd number of flutes to reduce unwanted harmonics.

Speed in Surface Feet per Minute (SFM)

HP = HEAVY PERIPHERAL

Axial Depth up to
1.0 x Diameter
Radial width .2 x Diameter

LP = LIGHT PERIPHERAL

Axial Depth up to Effective Length of Cut
Radial width .05 x Diameter

FINISH = FINISH OPERATION

Axial Depth up to Effective Length of Cut
Radial width .02 x Diameter

Note! Horsepower will be the limiting factor with larger diameters.

5SF-5 Flute Finisher

Premium Carbide

- 40 Degree Helix, Full Eccentric Primay
- Finishing in Aluminum and Non-Ferrous Alloys
- Available with Square and Radius Ends
- Available as TiCN and AlTiN Coatings

- Available Upon Request:
 - Coolant Groves
 - Additional Coatings
 - Specials

Crest-Kut® Roughing/Finishing End Mills

Weldon® Crest-Kut® are one of the first tools designed to help save time and money by being able to rough and finish in one application. Weldon® offers this unique tool in a range of materials from High Speed Steel, Premium High Speed Steel and Powdered Metal (upon request), to help in machining materials from Aluminum to Titanium. This unique tool has been copied by many, but there is still only one name in this tool style and that is the Weldon® "Crest-Kut®".

WELDON®

As in the past, and going forward this tool will:

- Minimum Vibration and Chatter
- Efficient Distribution of Cutting Temperatures
- Compensating Cutting Forces
- Minimum Chip Recutting
- Maximum Cutting Edge Life
- Longer Tool Life
- Reduced Machine Down Time
- Easily Resharpened

Finishing End Mills

Crest-Kut® End Mills, Non-Center Cutting, Multi-Flute

M-7, HSS

- Non-Center Cutting, 4, 6, 8 and 10 Flutes
- 30 Degree Right Hand Helix, Right Hand Cut
- Two Screw Drive on 7/8" Shanks and Larger

- Cutting Diameter
Tolerance +.003/-003

Crest-Kuts® are designed to rough and finish in one operation. The sinusoidal wave minimizes chip re-cutting, reduces vibration and chatter thereby extending tool life. These tools will not plunge.

- Available Upon Request:
 - Radius Ends
 - Whistle Notch
 - Additional Coatings

Crest-Kut® End Mills, Non-Center Cutting, Multi-Flute

M-42, HSS

- 4, 6 and 8 Flutes Non-Center Cutting
- 30 Degree Right Hand Helix, Right Hand Cut
- Two Screw Drive on 7/8" Shanks and Larger

- Cutting Diameter
Tolerance +.003/-003

Crest-Kuts® are designed to rough and finish in one operation with excellent finish in titanium and ferrous alloys. The sinusoidal wave improves chip evacuation and minimizes chip re-cutting. These tools will not plunge.

- Available Upon Request:
 - Radius Ends
 - Whistle Notch
 - Additional Coatings

Crest-Kut^{2™} End Mills, Center Cutting, Multi-Flute-Ground

M-42, HSS

The Crest-Kut^{2®} end mills are the next generation of this renowned tool. Ground completely on a CNC platform, this next generation allows a heavier cut with a more uniform chip. Preferred by some operators for peripheral milling. All tools are supplied as center cuttings.

- 4, 6 and 8 Flutes Center Cutting
- 37 Degree Right Hand Helix, Right Hand Cut
- Two Screw Drive on 7/8" Shanks and Larger

- Cutting Diameter
Tolerance +.003/-003

- Available Upon Request:
 - Radius Ends
 - Whistle Notch
 - Additional Coatings

WELDON[®]

Crest-Kut® Reduced Neck, Center Cutting, Multi-Flute

M-42, HSS

- 4 and 6 Flutes Center Cutting
- 30 Degree Right Hand Helix, Right Hand Cut
- Two Screw Drive on 7/8" Shanks and Larger

- Cutting Diameter
Tolerance +.003/-003

A reduced neck for reach and stability enables this tool to rough and finish in hard to reach areas where heavier cuts are required over a conventional end mill. All tools are supplied as center cutting.

- Available Upon Request:
 - Radius Ends
 - Whistle Notch
 - Additional Coatings

S = SLOTTING

Axial Depth up to
1.0 x Diameter
High Coolant Pressure

HP = HEAVY PERIPHERAL

Axial Depth up to
1.5 x Diameter
Radial with .5 x Diameter

LP = LIGHT PERIPHERAL

Axial Depth up to
2.0 x Diameter
Radial with .2 x Diameter

CALCULATIONS FOR SPEED

RPM = $(3.82 \times \text{SFM}) / \text{DIA.}$
SFM = $(\text{RPM} \times \text{DIA.}) / 3.82$

CALCULATIONS FOR FEED

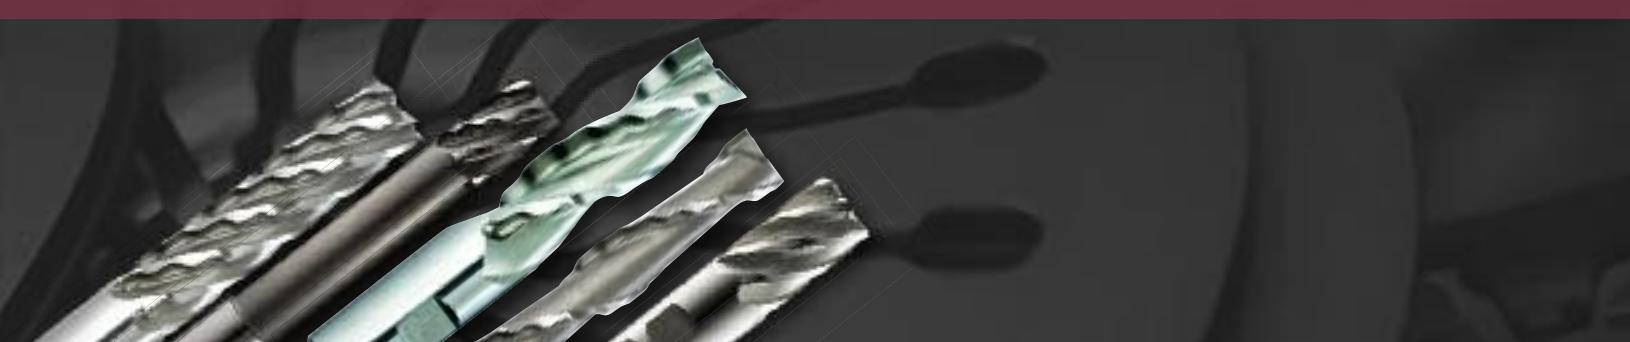

IPM = # of FLUTES x FPT x RPM
FTP = IPM / ($\text{RPM} \times \# \text{ of Flutes}$)

Note! Horsepower will be the limiting factor with larger diameter end mills. Using coated end mills will improve tool life.

Note! Horsepower will be the limiting factor with larger diameter end mills. Using coated end mill will improve tool life.

Bulldog® Roughing End Mills

Bulldog® roughing end mills have a sinusoidal chipbreaker form which produces small chips. This feature allows the tool to run at faster feed rates than conventional tools resulting in higher material removal rates. Parts machined with these tools usually require a finishing pass with a conventional tool. The roughing end mills are offered with different substrates and several tooth forms that match tool design to specific applications.

Single End Multi-Flute, Coarse Pitch Roughers for Bridgeports, Non-Center Cutting

M-7, HSS

- For Medium Hardness Materials
- Will Not Plunge
- Profile and Open-Ended Slotting
- High Speed Steel
- 30 Degree Right Hand Cut, Right Hand Helix
- Cutting Diameter Tolerance +.005/-0.000
- Two Screw Drive on 7/8" Shanks and Larger

WELDON®

Single End Multi-Flute Ball, Coarse Pitch Roughers, Center Cutting

M-42, HSS

- For Medium Hardness Materials
- Plunge and Ramp
- Profile, Slot and Pocket
- 8% Cobalt High Speed Steel

- Large Core for Rigidity
- 30 Degree Right Hand Cut, Right Hand Helix
- Cutting Diameter Tolerance +.005/-0.000

- Two Screw Drive on 7/8" Shanks and Larger

S = SLOTTING

Axial Depth up to
1.0 x Diameter
High Coolant Pressure

HP = HEAVY PERIPHERAL

Axial Depth up to
1.5 x Diameter
Radial with .5 x Diameter

LP = LIGHT PERIPHERAL

Axial Depth up to
2.0 x Diameter
Radial with .2 x Diameter

CALCULATIONS FOR SPEED

RPM = $(3.82 \times \text{SFM}) / \text{DIA.}$
 $\text{SFM} = (\text{RPM} \times \text{DIA.}) / 3.82$

CALCULATIONS FOR FEED

IPM = # of FLUTES x FPT x RPM
 $\text{FTP} = \text{IPM} / (\text{RPM} \times \# \text{ of Flutes})$

Note! Horsepower will be the limiting factor with larger diameter end mills. Using coated end mills will improve tool life.

General Purpose M7, HSS End Mills

Weldon® offers a variety of general purpose and special application end mills that have been designed to ANSI specifications. These tools are made from a substrate that offers good abrasion resistance for wear and red hardness at higher milling temperatures than other high speed steels.

WELDON®

2 Flute, Single End, Plain Shanks

M-7, HSS

- Shank Diameter Same as Flute Diameter
- Plain Shank, No Flats
- Plunge and Ramp
- Pocket, Profile and Slot
- Center Cutting
- Large Core for Rigidity
- Cutting Tolerance is +.000/-0.0015
- 30 Degree Right Hand Helix, Right Hand Cut

3 Flute, Single End

M-7, HSS

- Medium Hardness Materials
- Plunge and Ramp
- Profile, Slot and Pocket
- 30 Degree Right Hand Helix, Right Hand Cut
- Center Cutting
- Large Core for Rigidity
- Cutting Diameter Tolerance is +.003/-0.000
- Two Screw Drive on 7/8" Shanks and Larger

S = SLOTTING

Axial Depth up to
1.0 x Diameter
High Coolant Pressure

HP = HEAVY PERIPHERAL

Axial Depth up to
1.5 x Diameter
Radial with .5 x Diameter

LP = LIGHT PERIPHERAL

Axial Depth up to
2.0 x Diameter
Radial with .2 x Diameter

CALCULATIONS FOR SPEED

RPM = $(3.82 \times \text{SFM}) / \text{DIA.}$
SFM = $(\text{RPM} \times \text{DIA.}) / 3.82$

CALCULATIONS FOR FEED

IPM = # of FLUTES x FPT x RPM
FTP = IPM / (RPM x # of Flutes)

Note! Horsepower will be the limiting factor with larger diameter end mills. Using coated end mills will improve tool life.

S = SLOTTINGAxial Depth up to 1.0 x Diameter
High Coolant Pressure**HP = HEAVY PERIPHERAL**Axial Depth up to 1.5 x Diameter
Radial width >.5 x Diameter**LP = LIGHT PERIPHERAL**Axial Depth up to 2.0 x Diameter
Radial width >.2 x Diameter**CALCULATIONS FOR SPEED**RPM = $(3.82 \times \text{SFM}) / \text{DIA}$.
 $\text{SFM} = (\text{RPM} \times \text{DIA}) / 3.82$ **CALCULATIONS FOR FEED**IPM = # of FLUTES x FPT x RPM
 $\text{FTP} = \text{IPM} / (\text{RPM} \times \# \text{ of Flutes})$ **Note!** Horsepower will be the limiting factor with larger diameter end mills. Using coated end mill will improve tool life.

General Purpose M-42, HSS End Mills-Multi-Flute

Weldon® offers a variety of M-42, HSS and special application end mills that have been designed to ANSI and NAS specifications. These tools are made from a substrate that offers good abrasion resistance for wear and red hardness at higher milling temperatures than other high speed steels.

WELDON®

S = SLOTTING

Axial Depth up to
1.0 x Diameter
High Coolant Pressure

HP = HEAVY PERIPHERAL

Axial Depth up to
1.5 x Diameter
Radial with .5 x Diameter

LP = LIGHT PERIPHERAL

Axial Depth up to
2.0 x Diameter
Radial with .2 x Diameter

CALCULATIONS FOR SPEED

$$\text{RPM} = (3.82 \times \text{SFM}) / \text{DIA.}$$

$$\text{SFM} = (\text{RPM} \times \text{DIA.}) / 3.82$$

CALCULATIONS FOR FEED

$$\text{IPM} = \# \text{ of FLUTES} \times \text{FPT} \times \text{RPM}$$

$$\text{FTP} = \text{IPM} / (\text{RPM} \times \# \text{ of Flutes})$$

Note! Horsepower will be the limiting factor with larger diameter end mills. Using coated end mills will improve tool life.

S = SLOTTING

Axial Depth up to 1.0 x Diameter
High Coolant Pressure

HP = HEAVY PERIPHERAL

Axial Depth up to 1.5 x Diameter
Radial width >.5 x Diameter

LP = LIGHT PERIPHERAL

Axial Depth up to 2.0 x Diameter
Radial width >.2 x Diameter

CALCULATIONS FOR SPEED

RPM = $(3.82 \times \text{SFM}) / \text{DIA}$.
 $\text{SFM} = (\text{RPM} \times \text{DIA}) / 3.82$

CALCULATIONS FOR FEED

IPM = # of FLUTES x FPT x RPM
 $\text{FTP} = \text{IPM} / (\text{RPM} \times \# \text{ of Flutes})$

Note! Horsepower will be the limiting factor with larger diameter end mills. Using coated end mill will improve tool life.

Powdered Metal End Mills

Powdered Metal end mills provide a bridge between cobalt tool performance characteristics and carbide tool performance. Powdered Metal tools have increased toughness, a feature that provides greater resistance to edge chipping, resulting in longer tool life and higher cutting feeds and speeds. These tools can machine very tough materials without excessive cutting edge wear.

CALCULATIONS FOR FEED

$$\text{IPM} = \# \text{ of FLUTES} \times \text{FPT} \times \text{RPM}$$

$$\text{FTP} = \text{IPM} / (\text{RPM} \times \# \text{ of Flutes})$$

Note! Horsepower will be the limiting factor with larger diameter end mills. Using coated end mills will improve tool life.

For additional support and for maximum optimization of your Weldon tools,

- Free-Cutting
- Chatterless Finish
- Weldonite Coating
- Cuts a Wide Range of Materials

Weldon high-speed steel countersinks and deburring tools are known for their unique designs and their ability to cut a wide range of materials from wood, plastic and metal. This unique tool is free cutting and chatterless which leave a smooth finish. Tools are stock for 60, 82, 90 and 100 degree cutting.

Countersink Sets

Description	Part Number	EDP
The 60° Set consists of six tools: DC-6, DC-8, DC-14, DC-18, DC-26 and DC-36	60DB	99038-94-W
The 90° Set Consists of six tools: DB-6, DB-8, DB-14, DB-18, DB-26 and DB-36	90DB	99040-94-W
The 82°-1C set consists of nine tools: CS-5S, CS-6S, CS-8S, CS-10S, CS8-1, CS10-1, CS12-1, CS14-1 and CS16-1. Pilots with basic diameters are furnished with this set.	1C	99034-94-W
The 82°-1C set consists of nine tools: CS-5S, CS-6S, CS-8S, CS-10S, CS8-2, CS10-2, CS12-2, CS14-2 and CS16-2. Pilots with 1/64 oversize diameters are furnished with this set.	2C	99036-94-W
The 82°-WC set consists of four tools: CS-5S, CS-6S, CS-8S and CS-10S	WC-Set	99044-94-W
The 82°-GC set consists of four tools: CS-6S, CS-8S, CS-10S and CS-18	GC-Set	99042-94-W
The 82°-WCG set consists of five tools: CS-5S, CS-6S, CS-8S, CS-10S and CS-18	WCG-Set	99046-94-W
The 82° Hex Shank Countersink set consist of three tools: CS-3SH, CS-8SH, CS-18H	CSH-SET	98903-33-W
Rivet Head Remover, one piece construction		60515-00-W

- Free Cutting
- Offerings in Short and Long Series for Reach
- Made of High Speed Steel
- 2 Flutes for Better Chip Elevation

The Weldon Tu-Lip Counterbores are extremely free cutting. Generous chip room in the flutes minimizes breakage caused by clogging. Solid pilots without grooves will not ream or mar holes.

Precision Hole Saws and Arbors

M-7, HSS

- Saws Made From Hardened High Speed Steel
- Precision Tolerances
- For Non-Ferrous and Ferrous Alloys
- Arbors are Made From Tool Steel, One Piece Construction

The hardened High Speed steel hole saws are manufactured to precision tolerances. The hole saw arbors are made from one piece construction of hardened tool steel with precision ground shoulders and threads. The arbors have wrench flats for hole saw removal.

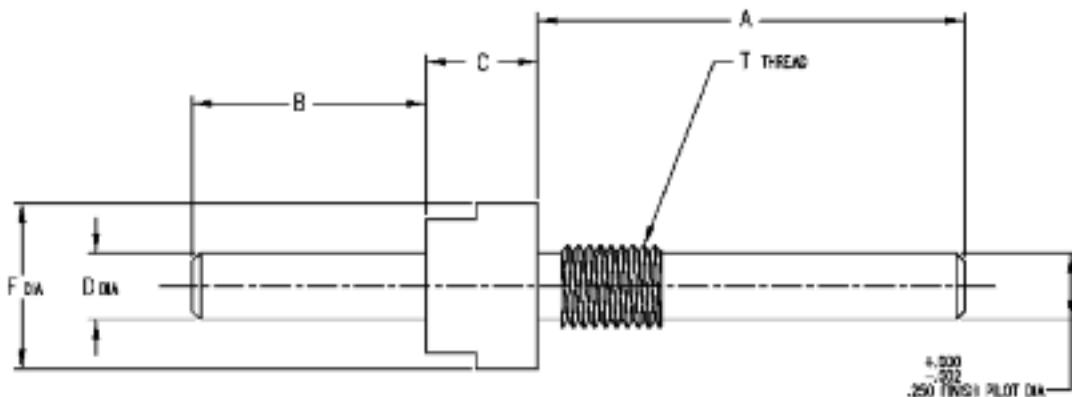

Hole Saws

Suggested Cutting Speed for “DB, DC, CSA and CS” Tools.

Materials	Cutting Speed (sfm)*
STEEL	
Up to 240 Brinell (24Rc)	50 - 70
Over 240 to 320 Brinell (24 to 35 Rc)	30 - 50
CAST STEEL	40 - 60
STAINLESS STEEL	30 - 50
CAST IRON	
Regular	60 - 80
Hard	5 - 30
NON-FERROUS	
Brass	150 - 200
Aluminum - Magnesium	150 - 200
Copper	80 - 120
Bronze	
Regular	70 - 90
Hard	20 - 40
TITANIUM	
Unalloyed	40 - 60
Alloyed	30 - 50
ZINCONIUM	40 - 60
HIGH TEMPERATURE ALLOYS	
Ferritic Low Alloys	30 - 50
Austenitic Alloys	15 - 25
Nickel Base Alloys	5 - 15
Cobalt Base Alloys	5 - 10
NON-METALLICS	
Silicon Free	80 - 120
Silicon Containing	20 - 40

* Surface Feet per Minute (sfm) = RPM x large diameter of countersink in inches x .262

Note! Hand feed recommended • Use light feed pressure • Allow tools to cut at its own rate • Always use with suitable cutting lubricant

EDP Number Index, 58243–58381

EDP Number Index, 58381–59381

If the EDP number is known for the desired tool, it can be found in the numeric EDP listing.
Find the desired EDP number and turn to the corresponding page.

Limited Warranty

Weldon warrants to original equipment manufacturers, distributors and industrial and commercial users of its products that each new product that it manufactures or supplies is free from defects in material and workmanship. Its sole obligation under this warranty is limited to furnishing, without additional charge, a replacement for, or, at its option, repairing or issuing credit for any such product which shall, within one year from the date of sale by **Weldon** be returned freight prepaid to **Weldon** and which, upon inspection, is determined by **Weldon** to be defective in materials or workmanship. The provisions of this warranty shall not apply to any product which has been subjected to misuse, improper operating conditions, or which has been repaired or altered, if such would adversely affect performance of the product. Complete written information with respect to all such matters must be furnished to **Weldon** as a prerequisite to its consideration of any claim or complaint under this warranty.

The repair, replacement or issuance of credit for parts provided for in this warranty constitutes the Buyer's exclusive remedy. The warranty is in lieu of all other warranties, express or implied, including any implied warranty of merchantability or fitness for a particular purpose. **Weldon** has no liability or responsibility on any claim of any kind, whether in contract, tort or otherwise, for any loss or damage arising out of, connected with, or resulting from the manufacture, sale, delivery or use of any product sold hereunder, in excess of the cost of replacement or repair as provided herein. In no event shall **Weldon** be liable for any special, incidental or consequential damages. **Weldon** makes no other warranty, express or implied, except as set forth above; and neither assumes nor authorizes any other person or entity to assume for it any other obligation or liability in connection with any of its products.

WARNING

Any cutting tool may break or shatter under improper use. Government regulations require use of safety glasses and other appropriate safety equipment at all times in the vicinity of use. Wet or dry grinding of cutting tools produces potentially hazardous dusts or mists; to avoid adverse health effects, use adequate ventilation and read the material Safety Data Sheet for further applicable tool material or grade before grinding.
